Technical Assistance to Local Courts

OHIO TECHNICAL ASSISTANCE TO LOCAL COURTS

Ohio has dedicated part of its STOP VAWA funding to support local court efforts to implement effective responses to domestic violence. This activity supports bringing national caliber faculty to communities to explore important issues the local court has identified. Through this activity, local courts and their justice partners have built capacity on issues such as differentiated supervision of domestic violence offenders, trauma-informed court practices, and felony-level court response to domestic violence. This activity also has provided opportunities for judicial leadership.
